Subject: Your Warehouse Receipt is in Stock - Ref# 76587658465 (3431)

Dear Ed's Electronics Mfg.,

Please be aware that 76587658465 (3431) has been counted and put into inventory. You may view this transaction online by logging on to our website and clicking on the View Transaction Report.

Carrier: UPS
Container #: 8888888

The following is a summary of the receipt:

SKU	Qualifier	Qty#	LotNumber	Serial#
10598		1,000.00		
23658		1.00		787878

If you have any questions, please contact us at your convenience.

Thank you,
Joe's Logistics & Warehousing

Control

Manage and Control Your Inventory

- Web-based order entry from anywhere in the world allows order shipment requests to be immediately entered into system.
 - Select specific Lot Numbers and/or Serial Numbers for shipment
- See the same information as 3PL warehouse employees to help prioritize warehouse operations
- Always know what is happening in 3PL warehouses worldwide

Accuracy

A More Accurate Supply Solution

- Record inventory and sales events at the time of the transaction
 - Enables faster Order-to-Cash Cycle so you can invoice or bill quicker
- The 3PL warehouse captures of billing information at time of transaction for greater accuracy
- Eliminate data entry errors with:
 - Web-based order entry option
 - Barcode Scanning Eliminates Data Entry
 - EDI integration for order requests and shipping details

Accuracy

Advanced Features

- Barcode Scanning
 - Lot Number, Serial Number and/or Expiration Date Tracking
- EDI Integration Ready
 - 6 Standard File Formats
 - X12
 - Tab-Delimited
 - Fixed Position Flat-File
 - XML
 - SPS Commerce 940/945 (does not include SPS Commerce fees)
 - DiCentral EDI 940/945 (does not include DiCentral fees)
 - Retailer-Compliant UCC-128 Label Printing

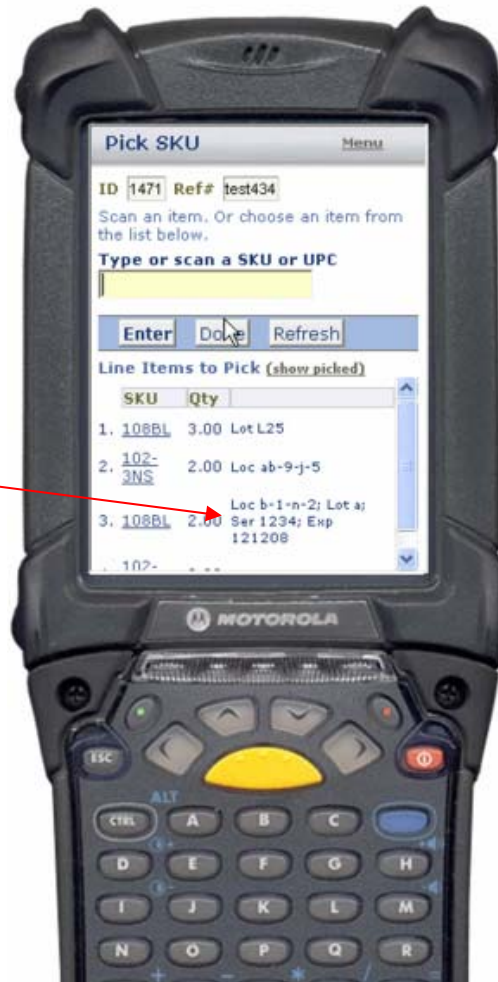

Accuracy

Barcode Scanning

Barcode Scanning provides real-time integration to warehouse.

- Ensures correct SKU, Quantity, Lot # and/or Serial Number is selected.
- Real-time integration updates application immediately.
- Allows for greater accuracy by eliminating need for data entry of complex product information.

Accuracy EDI Integration

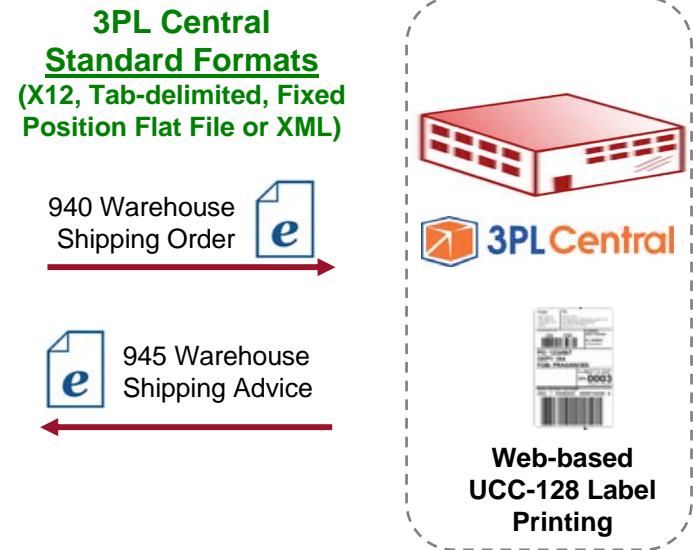

Retail Customers

Supplier

3PL Warehouse

3PL Central supports direct integration with suppliers in the following situations:

- Supplier maps to one of 3PL Central's standard formats (X12, Tab-delimited, Fixed Position Flat File or XML)
- 3PL Central performs custom programming (for a fee) and maps to the supplier's formats
- Business-to-Business – When no direct to retailer communications is needed (e.g. EDI 856). For retailer integration we partner with SPS Commerce or DiCentral or your existing EDI service provider.
